KITTEN HEALTHCARE PACKAGE

We have designed this package in order to give your kitten the best possible start in life. The cost of the package is £99.99 which is payable on your first visit to the surgery.

- **Full course of vaccinations** consisting of two injections which give protection against 'Flu, Feline Enteritis and Feline Leukaemia Virus.
- **Health check** to ensure that your kitten is healthy before vaccination.
- **A Microchip** which gives your kitten unique identification number logged on a national database, which should your kitten go missing would assist in reuniting you with your pet. For an extra £6 we can make this a Biotherm chip that can detect and transmit your kitten's body temperature. **Please arrange an appointment with a nurse for this to be done.**
- **First worming treatment** essential for the good health of your kitten and to rule out any risk to your children.
- **First flea treatment** to prevent the discomfort these parasites cause. The Stronghold pipette treats fleas and worms with a very simple spot on preparation.
- **Your first bag of Royal Canin kitten food.** This is a premium range cat food which we highly recommend and is available to cover all stages of your pet's life.

4 weeks FREE insurance cover available, accidents do happen!!

Please note the insurance policy is only activated on completion of the cover note with a member of staff who will sign it.

When the time comes for neutering present this voucher and we will give you 10% off the cost of the operation.
