

## PUPPY HEALTHCARE PACKAGE

**Save over £50**

We have designed this package in order to give your puppy the best possible start in life. The cost of the package is £105.04 which is payable on your first visit to the surgery.

- ❑ **Health check:** to ensure that your puppy is healthy before vaccination.
- ❑ **Full course of vaccinations:** consisting of two injections which give protection against Canine Distemper, Hepatitis, Parvovirus, Parainfluenza Virus and Leptospirosis.
- ❑ **A Microchip:** gives your puppy a unique identification number which is logged on a national database, which, should your puppy go missing, would assist with reuniting you with your pet. For an extra £6 we can make this a Biotherm chip that can detect and transmit your puppy's body temperature. Please arrange an appointment with a nurse for this to be done.
- ❑ **First worming treatment:** essential for the good health of your puppy and to rule out any risk to your children.
- ❑ **First flea treatment:** to prevent the discomfort these parasites cause. The Stronghold pipette treats fleas and worms with a very simple spot on preparation.
- ❑ **Royal Canin Puppy food:** this is a premium range dog food which we highly recommend and is available to cover all stages of your pet's life.
- ❑ **10% of Neutering:** when the time comes we will simply deduct 10% off the cost of your puppy's operation when you come to pay.
- ❑ **4 weeks free insurance:** accidents do happen!!!  
Please note insurance policy is only activated on completion of the cover note which a member of staff will sign for you.
